

OceanManager introduces mHSEQ.

mHSEQ is OceanManager’s premier software suite for compliance with international regulations for marine Health, Safety, Environment & Quality (HSEQ). Our modules are built to be simple and easy to use via an intuitive, user friendly cloud-based software that is synchronised between ship and shore.

- ✔ **Rest Hours Management with QR Code**
 Intuitive recording and logging of Work and Rest Hours for crew on board.
- ✔ **Certificate Management**
 A smart repository of all the certificates required to be aboard your vessels that notifies you when they are due for renewal.
- ✔ **Audits, Inspections, and Vetting**
 Schedule and coordinate all audits required by regulatory bodies and your internal systems.
- ✔ **Risk Management**
 Maintain and update risk assessment sheets, checklists, and work permits, allowing the Master to effectively plan work.
- ✔ **Knowledge Manager**
 The central, synchronised repository for all documents required by your Safety Management System.
- ✔ **Ship Shore Reporting**
 Simplify filling out and submitting mandatory forms each time your vessel makes port using smart, synchronised forms.
- ✔ **Vessel Particulars**
 Get an up-to-date view of all information associated with a vessel.
- ✔ **Port Forms**
 Country specific repository of forms to be submitted to port authorities like immigration, customs, and port security.
- ✔ **Analysis & Reporting**
 Create detailed reports from data generated from all audits conducted within your company.

OceanManager is a maritime software solutions company, established over a decade ago in California, USA providing Fleet Management and Operational Intelligence software products, along with other bespoke services for Technical Fleet Management, that help Ship Owners and Managers operate their vessels more safely and efficiently. Our software is currently in use on more than 1200 vessels worldwide.

Offices: USA - Greece - Singapore - India
